

I support XM Radio, if broadcasters feel threatened by the success of satellite radio, they should improve their services not cry to the government to protect their businesses by attacking satellite radio. This group has in the past tried to block every innovative technology that has been warmly welcomed into America's homes and cars. In the 1940's, radio broadcasters tried to squash television. In the 1970's, AM broadcasters tried to put the kibosh on FM stations.

XM has played by the rules since day one. This is a question of consumer choice and the freedoms protected by the First Amendment. Let me make my own choice as what i want to listen to, be it weather or music or talk radio on a local radio Station or on XM. I Strangly oppose HR 4026!
